## A Note concerning your Lap Times

Thank you for attending the club's second Haunted Hills Special Stage and helping to make it a safe and enjoyable day.

Unlike our first event at Haunted Hills in September, 2009 when conditions tested all competitors, conditions at this event were just about perfect. We started on a warm sunny morning with an almost cloudless sky. The sun continued to shine and whilst it became considerably warmer over the course of the day and the local temperature was just on 30°C it was not a scorcher. A wind shift in mid-afternoon made conditions more pleasant. Despite a smaller field than anticipated, Competitors generally advised they had a great day. We trust you enjoyed your experience at Haunted Hills and achieved your objectives for the day.

For this event we used two of the many configurations in which the circuit at Haunted Hills can be used, these were:

- the **Perimeter Configuration**: This configuration, which we used exclusively at our first event, was used for the morning session; and
- the **Figure 8 Configuration**: This is the configuration that was used for the Australian Hillclimb Championship and was used for the Afternoon session.

The timing system for this event was an electronic TAG Hueur laser-beam system owned and operated by the Timing Team from the Gippsland Car Club. The timing system although computer based, requires the timekeeping crew to identify each car by its pre-assigned club competition number affixed to the vehicle. The club's competition number system you were provided with on the day ensures numbers are consistently presented and easy to interpret.

According to the timing system there were 280 timed runs recorded on the day. **Incidentally, if you forgot to return your competition number after the event, we would be very appreciative if you returned it by mail.**

A copy of this booklet, as well as others containing the results from similar events the Club has run since 1995, can be downloaded from the "Quick Access" page on the Club's website at [www.maserati.org.au](http://www.maserati.org.au). Some members find this of use when comparing performances over time.

We trust you had a great day.
