## A Note concerning your Lap Times

Thank you for attending the club's Members Practice Day and helping to make it a safe and enjoyable day. Whilst the Melbourne forecast for the day was somewhat dire with 40 °C it was hot in the morning until the very windy change whipped across the island in the middle of the day to make things interesting for drivers approaching Turn 1. By the second timed run track temperatures dropped and better times were recorded. Those who stuck out the conditions were rewarded with better outcomes. Apart from interesting manoeuvres by two drivers and a few mechanical dramas, most drivers appeared to have an uneventful day. We trust you achieved your objectives for the day.

The Club uses a computer based timing system to record the times of drivers at its track days. For this event Greg Aimers was as usual Chief Timekeeper. Our thanks to Greg and to Jason Carrington who provided some welcome support to Greg. Our thanks for the great job.

The club timing system although computer based, requires timing to identify each car by its pre-assigned club competition number and then enter that number to match the specific time we have recorded. Errors, where they occur, usually relate to the *visibility* of the car number. It is for this reason the Club introduced in 1997, the competition number system you were provided with on the day. The system ensures numbers are consistently presented and easy to interpret. For this to work the timing crew must be able to identify the number of a given vehicle as it crosses (at high speed) in front of them at the timing tower. Traffic, may sometimes obscure a vehicle. Not helping the situation is poor placement of the number on the car. Combinations of these factors can lead to:

- a vehicle being missed on one lap, but being picked up on another lap. This may lead to two laps being reported as if it were one lap.
- a vehicle whose number is obscured may be mistaken for another similar vehicle on the track at the same time. Where this is identified we discard the inappropriate time and record 'nt' or not timed in the times attached.

As in all such systems some error is inevitable. However an inspection of the results shows that of the 826 laps recorded, there were few, if any, errors. There were many laps not recorded in the Morning session, so the lap count is conservative. Drivers sharing a vehicle should be aware, as pointed out in the Supplementary Regulations, times are attributed to the club number displayed on the vehicle. If you failed to ensure your number was on the vehicle during your session, then your times will be attributed to the other driver sharing the car. **Incidentally, if you forgot to return your number after the event, we would be very appreciative if you returned it by mail.**

A copy of this booklet, as well as others containing the results from similar events the Club has run since 1995, can be downloaded from the "Quick Access" page on the Club's website at [www.maserati.org.au](http://www.maserati.org.au). Some members find this of use when comparing performances over time.

We trust you had a great day.
