## A Note concerning your Lap Times

Thank you for attending the club's Members' Practice Day and helping to make it a safe and enjoyable day. The day started with perfect conditions; temperature in the mid 20's with a cloudless blue sky. From 11.30 pm just before the start of the Timed Lap Sessions it started to heat up noticeably and then around 1.00 pm we got a wind shift and a northerly breeze and the temperature rose dramatically. Unfortunately the track conditions changed accordingly and many found they had to push a bit harder with lower grip to achieve better times than those which came more easily in the morning. Apart from a few who experienced mechanical dramas, most drivers appeared to have an uneventful day. We trust you achieved your objectives for the day.

The Club uses a computer based timing system to record the times of drivers at its track days. For this event Greg Aimers was as usual Chief Timekeeper and tackled the event single-handed. Our thanks to Greg for an outstanding job.

The club timing system although computer based, requires the Timer to identify each car by its pre-assigned club competition number and then enter that number to match the specific time we have recorded. Errors, where they occur, usually relate to the *visibility* of the car number, which this year, we sought to minimise by using the Yellow car number to be affixed to the windscreen. It was interesting to see that some drivers had difficulty in identifying the top left hand side of the windscreen. To reliably record a time, the timing crew must be able to identify the number of a given vehicle as it crosses (at high speed) in front of them at the timing tower. Traffic, may sometimes obscure a vehicle and sometimes the poor placement of the number on the car can make it difficult. Combinations of these factors can lead to:

- a vehicle being missed on one lap, but being picked up on another lap. This may lead to two laps being reported as if it were one lap.
- a vehicle whose number is obscured may be mistaken for another similar vehicle on the track at the same time. Where this is identified we discard the inappropriate time and record 'nt' or not timed in the times attached.

As in all such systems some error is inevitable. However an inspection of the results shows that of the 1494 laps recorded, there were few, if any, errors. There were many laps not recorded in the Morning session and the final passenger session of the day was not timed. Drivers sharing a vehicle should be aware, as pointed out in the Supplementary Regulations, times are attributed to the club number displayed on the vehicle. If you failed to ensure your number was on the vehicle during your session, then your times will be attributed to the other driver sharing the car. Incidentally, if you forgot to return your number after the event, we would be very appreciative if you returned it by mail.

A copy of this booklet, as well as others containing the results from similar events the Club has run since 1995, can be downloaded from the "Quick Access" page on the Club's website at [www.maserati.org.au](http://www.maserati.org.au). Some members find this of use when comparing performances over time.

We trust you had a great day.

# Special Thanks!

Every track day requires a team effort. Maserati Club track days are no different. Our thanks to Victorian Fire & Rescue Squad, RaceSolutions Motorsport for their paramedical team, ACE Towing for the Recovery crew and the Motorcycle Marshalling Team for their attendance and participation. Special thanks in particular are due to the following who gave up their time to help out as officials and ensure the Members' Practice Day was a safe and successful event. We hope you achieved your objectives.
