## A Note concerning your Lap Times

Thank you for attending the club's Trident Track Day and helping to make it a safe and enjoyable day. Conditions at Sandown were difficult early with wet overnight conditions and early morning showers, however the conditions improved progressively through the morning until the track was close to dry by early afternoon. Impressively, conditions continued to improve throughout the afternoon - we even got sunshine despite the rather bleak and cold start to the day. Melbourne's weather is certainly not predictable! We trust you enjoyed your experience at Sandown and achieved your objectives for the day - the early morning conditions were certainly testing.

The Club uses a computer based timing system to record the times of drivers at its track days. Chief Timekeeper for the day was Greg Aimers and he was assisted by Jason Carrington. Not all times were recorded in the Morning Session.

The club timing system although computer based, requires the timekeepers to identify each car by its pre-assigned club competition number and then enter that number to match the specific time we have recorded. Errors, where they occur, usually relate to the *visibility* of the club competition number. It is for this reason the Club introduced in 1997, the club competition number system you were provided with on the day. This system ensures that the vehicle numbers used are consistently presented and easy to interpret. However, for this to work the timing crew must be able to identify the club competition number of a given vehicle as it crosses (at high speed) in front of them at the timing tower - the timekeeper ignores any other number on the car. Traffic, may sometimes obscure a vehicle. Not helping the situation is poor placement of the club competition number on the car. Combinations of these factors can lead to:

- a vehicle being missed on one lap, but being picked up on another lap. This may lead to two laps being reported as if it were one lap.
- a vehicle whose number is obscured may be mistaken for another similar vehicle on the track at the same time. Where this is identified we discard the inappropriate time and record 'nt' or not timed in the times attached.

As in all such systems some error is inevitable. However an inspection of the results shows that of the 1268 laps recorded, there were few, if any, errors on Sunday. Incidentally, if you forgot to return your number after the event, we would be very appreciative if you returned it by mail.

A copy of this booklet, as well as others containing the results from similar events the Club has run since 1995, can be downloaded from the "Quick Access" page on the Club's website at [www.maserati.org.au](http://www.maserati.org.au). Some members find this of use when comparing performances over time.

We trust you had a great day.

## Maserati Club Track Events in 2008

The Grand Prix Track Day was the club's fourth event this year following on from the Members Practice Day at Phillip Island in January, the Grand Prix Track Day at Sandown in April and the Winter Track Day at Winton in June. There is now only one remaining track day scheduled for 2008:

- **Sunday, October 26, 2008** Annual Spring Track Day at Sandown International Motor Raceway - the regulations and entry forms are available on the club web site.

Members of the Club have also been invited to attend track days organised by other clubs. Details of these events and others may be accessed, when available, via the 'Quick Access' page on the club website at [www.maserati.org.au](http://www.maserati.org.au)
