

# The Maserati Annual Spring Track Day

at

Sandown  
International  
Motor Raceway

Sunday, October 18, 1998

Recorded lap times  
for Practice and the  
Timed Sessions

*Il Tridente: Located in Bologna's Piazza del Nettuno. It is this distinctively shaped trident head that inspired its adoption as the symbol for Officine Alfieri Maserati SpA. The red and blue of the Maserati badge are traditional Bologna Colours*

## A Note concerning your Lap Times

The Club uses a computer based timing system to record the times of drivers at its track days. Whilst part of the system is computerised, it still requires a time-keeping crew, to physically capture individual times.

For this event the timekeeper was Louis King one of the club's Winton Six Hour team and assisting him as "spotter" was Adam von Einem. Both Louis and Adam did a tremendous job, working unrelieved for the entire day!

The Club has continuously sought to improve its capacity to capture times over recent years, first with the acquisition of the "Motorsport Timing System" system from Ken Douglas and secondly with the introduction of Club car numbers, to improve the ease of identification of the number of the vehicle being timed. (*Did you return your car number?*)

The constraints of the current system, require us to identify a car by number only and enter the number of the car to match a specific time. Errors, where they occur, usually relate to the visibility of the car number. The timing crew must be able to identify the number on a given vehicle as it crosses (at high speed) in front of them at the timing tower. Traffic, may sometimes obscure a vehicle. Not helping the situation is poor placement of the number on the car. Combinations of these factors can lead to:

- # a vehicle being missed on one lap, but being picked up on another lap. This may lead to two laps or sometimes more being reported as if it were one lap.
- # a vehicle whose number is obscured may be mistaken for another similar vehicle on the track at the same time. This will lead us to discard the inappropriate time and record 'nt' or not timed in the times attached..

Both of these errors occurred on the day. However, their occurrence is quite small, when one considers that over 1,000 laps were timed by our timing crew.

Whilst it would be nice if everyone who attended our track days came equipped with a Dorian Transponder in their car, this may well never be the case in a Club where we encourage participation by the newcomer to motorsport as well as the more experienced circuit racer. The current system ensures everyone is timed in the same manner and it also reduces the cost of participation for newcomers.

Perhaps the great advantage of the current system is that it does provide us with a computer record of your times, which we then convert (via a spreadsheet or two) to a hard copy of the results for your personal records.

**Finally, the results as provided, are confidential and are for your personal use only. They are NOT intended for publication or dissemination to any third party whatsoever.** The summary of times that will appear in the next issue of the club newsletter "The Notebook" however, can be used in any manner you may think fit.

**Jim Reark  
Event Director
