A Note concerning your Lap Times

Thank you for attending the club's Winter Track Day and helping to make it a safe and enjoyable day. The conditions for this year's event were mixed to say the least. With reasonably heavy overnight rain the event got underway with a very damp track and an overcast sky. By 10.30 am the track was dry but the overcast remained. By 11.00 am we had a warming track and sunny breaks until 12 noon when we had a sunny day. At 2.00 pm the temperature dropped suddenly and the overcast returned. At 2.20 pm the rain started. At 3.05 pm the rain had become a deluge and the event was stopped for the day. The passage from the paddock to the track being 18" under water. We hope you had a chance to get a good lap in on the day and at least enjoyed your experience, even if you didn't manage to achieve your objectives for the day.

The Club uses a computer based timing system to record the times of drivers at its track days. For this event Greg Aimers the Chief Timekeeper was ably assisted by Jason Carrington.. Our thanks to them both for the splendid job they did, particularly later in the day when the cars were barely visible!.

The club timing system although computer based, requires our timekeepers to identify each car by its pre-assigned club competition number and then enter that number into the computer to match the specific time we have recorded. Errors, where they occur, usually relate to the *visibility* of the car number. The timing crew must be able to identify the number of a given vehicle as it crosses (at high speed) in front of them at the timing tower. Traffic, may sometimes obscure a vehicle. Not helping the situation is poor placement of the number on the car. Combinations of these factors can lead to:

- a vehicle being missed on one lap, but being picked up on another lap. This may lead to two laps being reported as if it were one lap.
- a vehicle whose number is obscured may be mistaken for another similar vehicle on the track at the same time. Where this is identified we discard the inappropriate time and record 'nt' or not timed in the times attached.

As in all such systems some error is inevitable. However an inspection of the results shows that of the 1199 laps recorded, there were few errors on Sunday. **Incidentally, if you forgot to return your number after the event, we would be very appreciative if you returned it by mail.**

A few times were missed during the morning practice sessions. Drivers sharing a vehicle should be aware, as pointed out in the Supplementary Regulations, times are attributed to the club number displayed on the vehicle. If you failed to ensure your number was on the vehicle during your session, then your times will be attributed to the other driver sharing the car.

A copy of this booklet, as well as others containing the results from similar events the Club has run since 1995, can be downloaded from the "Quick Access" page on the Club's website at www.maserati.org.au. Some members find this of use when comparing performances over time.

We trust you had a great day.
